

IN THE CLAIMS

Please amend the claims as follows:

Claims 1-5 (Canceled).

Claim 6 (Currently Amended): A steam generator comprising:

a steam generation portion comprising a steam-generating composition and ~~a paper sheet~~ pulp fiber as a support so as to inhibit movement of the steam generating composition, the steam-generating composition including a metal powder, activated carbon and a salt to be reacted with water and adapted to discharge steam as the metal powder is oxidized; and

an adhesive layer provided on a surface of the steam generator adapted to be applied to at least one of skin or mucosa of a user of the steam generator,

wherein the steam-generating composition is disposed in pore-like structures of ~~the a~~ a paper sheet and the adhesive layer includes at least one opening through which the steam or water vapor is discharged from the steam-generating composition.

Claims 7-8 (Canceled).

Claim 9 (Previously Presented): The steam generator according to Claim 6, wherein the adhesive layer comprises a water soluble substrate.

Claim 10 (Previously Presented): The steam generator according to Claim 6, further comprising a moisture permeable layer provided on an outer surface of the steam generation portion.

Claim 11 (Previously Presented): The steam generator according to Claim 6, further comprising a moisture impermeable layer provided on an outer surface of the steam generation portion.

Claim 12 (Previously Presented): The steam generator according to Claim 10, wherein the moisture permeable layer includes at least one of a non-woven fabric and a synthetic paper.

Claim 13 (Previously Presented): The steam generator according to Claim 6, further comprising a moisture impermeable layer adjacent to the adhesive layer.

Claim 14 (Previously Presented): The steam generator according to Claim 13, wherein at least one opening guiding the steam discharged from the steam generation portion is provided in the impermeable layer.

Claim 15 (Previously Presented): The steam generator according to Claim 6, wherein the adhesive layer includes at least one of a cosmetic and a pharmaceutical component.

Claim 16 (Previously Presented): The steam generator according to Claim 15, wherein the at least one of a cosmetic and a pharmaceutical component includes at least one of a blood circulation enhancer, a swelling reduction agent, a slimming agent, a painkiller, a moisture retaining agent, a peeling agent, a depilating agent, and an autonomic regulating agent.

Claim 17 (Previously Presented): The steam generator according to Claim 16, wherein the at least one of a cosmetic and a pharmaceutical component includes a blood circulation enhancer, and the blood circulation enhancer includes at least one of acidic mucopolysaccharides, chamomile, horse chestnut, ginkgo, hamamelis extract, vitamin E, nicotinic acid derivatives, and alkaloid compounds.

Claim 18 (Previously Presented): The steam generator according to Claim 16, wherein the at least one of a cosmetic and a pharmaceutical component includes a swelling reduction agent, and the swelling reduction agent includes at least one of horse chestnut, flavone derivatives, naphthalenesulfonic acid derivatives, anthocyanins, vitamin P, calendula officinalis, concholytic acid, silanol, Terminalia, Visnaga, and Majus.

Claim 19 (Previously Presented): The steam generator according to Claim 16, wherein of a cosmetic and a pharmaceutical component includes a slimming agent, and the slimming agent includes at least one of aminophylline, tea extract, caffeine, xanthine derivatives, inositol, dextransulfuric acid derivatives, horse chestnut, aescin, anthocyanadin, organoiodine compounds, Hypericum erectum, Spiraea japonica, Equisetum arvense, Rosmarinus officinalis, gingsen, Hedera rhombea, thomucase, and hyaluronidase.

Claim 20 (Previously Presented): The steam generator according to Claim 16, wherein the at least one of a cosmetic and a pharmaceutical includes a painkiller, and the painkiller includes at least one of indometacin, diclofenac, dl-camphor, flurbiprofen, ketoprofen, cayenne pepper extract, piroxicam, felbinac, methyl salicylate, and glycol salicylate.

Claim 21 (Previously Presented): The steam generator according to Claim 16, wherein the at least one of a cosmetic and a pharmaceutical agent includes a moisture retaining agent, and the moisture retaining agent includes a polyol.

Claim 22 (Previously Presented): The steam generator according to Claim 16, wherein the at least one of a cosmetic and a pharmaceutical component includes a peeling agent, and the peeling agent includes at least a protease.

Claim 23 (Previously Presented): The steam generator according to Claim 16, wherein the at least one of a cosmetic and a pharmaceutical component includes a depilating agent, and the depilating agent includes calcium thioglycolate.

Claim 24 (Previously Presented): The steam generator according to Claim 16, wherein the at least one of a cosmetic and a pharmaceutical component includes an automatic regulating agent, and the autonomic regulating agent includes  $\gamma$ -oryzanol.

Claim 25 (Previously Presented): The steam generator according to Claim 6, wherein the adhesive layer covers approximately 50% to approximately 99.9% of a surface to which the steam generator is applied.
